NOTES

- *Prices usually include one report. Where you require a second adapted report for school or employer, fees vary. If you only want a brief report, or do not require a report at all, we can provide a discounted price. Contact us for details.*
- **All prices for adult and adolescent assessments are based on online-only assessments. Primary school aged children usually require an in-person assessment element and some additional meetings, hence their extra cost. Occasionally in person assessment may not be necessary. Please ask us if we are able to provide an in-person assessment in your area. If you require us to come to you, travel expenses, travel time and room hire costs will be billed in addition.*
- *For child ADHD assessments, we administer QB Check a computer based objective behavioural test as standard. QB Check is also administered in adolescent and adult ADHD assessments where the diagnostic picture is unclear and further testing is required e.g., where there are large differences between informant report and self-report. For adults, we reserve the right to add an additional £50.00 to cover the test.*
- *If a standalone cognitive assessment is required, please contact us for details of our fees.*

- *Fees for health insurance clients vary, so please contact us for details. Note you will be liable for any shortfall between our quoted fee and the amount reimbursed to us by the health insurance company.*
